**Abstract:** I'm an expert in the subject of global warming. American and British governmental scientists are knowingly lying to the world about global warming. The truth will cause a world wide economic collapse, but the alternative is far worse. The real reason for global warming is the earth's orbit around the sun is decaying, in other words the earth is moving closer to the sun. I've studied this phenomenon since July-1983, warning people of the coming destruction, and death. People called me crazy at first. I understand the weather was normal at that time, now the weather is beginning to support my findings. December- 2007: Houston, Texas is experiencing warm sunny winters, a record high of 81degrees. Eventually Houston's winters will completely disappear, as time goes on. [The Journal of American Science. 2009;5(1):1-3]. (ISSN: 1545-1003).

Keywords: global warming; economic collapse; real reason

I'm an expert in the subject of global warming. American and British governmental scientists are knowingly lying to the world about global warming. The truth will cause a world wide economic collapse, but the alternative is far worse. The real reason for global warming is the earth's orbit around the sun is decaying, in other words the earth is moving closer to the sun. I've studied this phenomenon since July-1983, warning people of the coming destruction, and death. People called me crazy at first. I understand the weather was normal at that time, now the weather is beginning to support my findings. December- 2007: Houston, Texas is experiencing warm sunny winters, a record high of 81degrees. Eventually Houston's winters will completely disappear, as time goes on.

Houston is the perfect place to observe global warming, what's occurring in Houston in winter will occur to the rest of the world. The sun is over the southern hemisphere now, and in the past the sun's peripheral heat, and rays stayed within that part of the hemisphere, away from the equator, and the outer edges of the polar ice caps. The sun is thousands of times larger, than earth. The earth has moved, so close to the sun that it's peripheral rays, and heat has spread over the equator from the southern hemisphere to the southern part of the northern hemisphere, where Houston, Texas is located, and the sun's peripheral heat, and rays has spread over the outer edges of the south pole, and is melting the ice. The same thing will occur, when the sun reaches the northern hemisphere. The peripheral heat and rays will spread over the equator, and heat the northern part of the southern hemisphere, and melt the ice on the outer edges of the North Pole, Just ask the governments of Greenland, Iceland, and the city of Alaska-USA about their melting ice packs.

This trend will continue, until all the ice in both polar ice caps is melted, and until winter no longer exist in both hemispheres, back, and forth one polar ice cap at a time. The ice is melting faster in the summer months, faster than it can reform (build up) in the winter months. There is enough ice in both polar ice caps to flood 95% of the existing land mass of this planet. The warmer the winters, the hotter the summers. The direct heat, and rays from the sun will intensify as the earth move closer, that's the area of the earth the sun is stationed directly over. I grew up in Houston, Texas. I remember the hotter part of the day use to be 12:00 noon, now its 5:00 o'clock in the after noon. This is more evidence of earth's orbit is decaying. December- 2007: The thunderstorms and floods that occurred in the States of Oregon, And Washington State was suppose to by a snowstorm, after all its winter, but the atmosphere was too warm to support a snowstorm, so a thunderstorm was created instead, the flooding was extraordinary. January-2008 tornadoes touch down in the mid-west of America, causing death, and destruction in the millions of dollars. February-2008 many tornadoes touched down, and killed dozens of people.

The only different between a snow storms, and a thunderstorms is the temperature of the upper atmosphere. The position of the sun to the earth determines the temperature of the upper atmosphere. This is the type of weather that will dominate in the future, floods, and tornados during the winter months, when these storms are not suppose to develop. The weather will go from one extreme to the other, from flooding to droughts in various parts of the United States, and the world. Food production will gradually come to a halt, because of the weather. As I said in the past global warming has nothing to do with CO<sub>2</sub> gases, R-12

gases, CFC gases, a hole in the ozone, the sun going nova, nor methane gases leaking from the ocean's floor, as you will see in the future. Global warming will not be reverse by ridding the atmosphere of these gases.

Some of these gases have polluted the atmosphere since the industrial revolution in America, and Europe. In the early 20th century, before emission devices were installed on automobiles, and trucks the air in many cities was, so polluted it blotted out the sun. And cause breathing problems. There was no global temperature increase during this time period. Global warming is in its beginning stages, and will gradually get worse. It will not occur over night, and the winters will diminish gradually, over the decades. June-1978: I went to the mountains of Big Bear, California. As I looked down the city of Los Angeles, California. The greenhouse gas emissions from automobiles, trucks, and industrial activity was, so bad a very noticeable thick haze formed reducing visibility by 40%. There was no noticeable spike in temperature in Los Angeles, California, during that period. Carbon dioxide is poisonous to all mammals, including humans. If the levels of CO<sub>2</sub> gases are, so high why there haven't been reports of carbon dioxide poisonings, such conditions require hospitalization.

The reason the earth is moving closer to the sun the molten core of the planet is cooling, because it's not getting enough crude oil (fuel). The oil companies drill into an oil well to extract the crude oil. These oil wells are actually self-pressurizing fuel cells, and over time the crude oil extraction process used by the oil companies releases the pressures needed to force the oil into the outer core. All oil wells (self-pressurizing fuel cells) must be capped off, and the pressure within them brought back to normal, so the crude oil can be forced into the outer core. This will raise the temperature in the core, and strengthen the earth's magnetic field, and push the earth away from the sun. The higher the temperature in the core the stronger the earth's magnetic field, and the cooler the temperature in the core, the weaker the earth's magnetic field. The core is cooling, because it's not getting the fuel (crude oil) it once did, before man discovered crude oil, and new uses for it. Everything that generates energy, or expends energy needs fuel, and the earth is no different from any other machine. People, and animals derive their energy from food, plants derive their energy from water, and sun light, automobiles from gasoline, thunderstorm, snowstorms, hurricanes, tornadoes derive their energy from electricity, because these storms are electro-magnetic phenomenon. The earth generates a magnetic energy field, and it is derived from combustion of crude oil in its outer core.

This is a man made situation, not the will of God. People take the earth's magnetic field for granted, because it's invisible, and silent. The magnetic field holds people, object, and the oceans to the surface of earth. It keeps the air we breathe from escaping into space. It protects life on this planet from the harshness, vacuum, poisonous gases, and radiation of space. It protects life on the surface of this planet from sun flares, and it locks the earth in orbit around the sun, locks the moon in orbit around the earth, and keeps the earth at a safe distance from the sun, and moon. Contrary to popular belief the electro-magnetic energy in thunderstorms, winter storms, hurricanes, and tornadoes, etc. are not generated by sunspots, neither, sun flares, nor energy flares from deep space. The energy in these storms are generated by the earth magnetic field. The earth acts as a generator's armature. The earth rotates at a thousand miles per hour, its magnetic field brushes against the magnetic field of the surrounding universe. The energy is trapped in the earth's atmosphere, and dispersed throughout the earth's atmosphere, and that's just some of the things earth's magnetic field does. The earth is a self-contained biosphere. These fuel cell (oil wells) can be re-pressurized by igniting the methane gases in them.

In fuel cells thought to be empty, such as spindle top in Beaumont, Texas. It will be necessary to pump in a mixture of air, and methane gas, and ignite the mixture. The gas will expand, when ignited creating the necessary pressure to force the remaining oil into the core. These fuel cells extend for thousands of miles, from the upper crust down to the outer core of the planet, the oil companies can only drill less, than ten miles down. There are millions of gallons of crude oil remaining in these fuel cells, and they are located all around this planet for even heating of the core. Uneven heating of the core will result in a shift of the earth's axes. Normalizing the flow of crude oil to the core will increase the temperature in the outer core, and the outer core heats the inner core, which generates the earth's magnetic field. If left alone the temperature in the outer core will stabilize. This is the only way to save all life on this planet. The evidence that large quantities of crude oil are combusted, and sustain the high temperatures in the core. Every conceivable by-product of crude oil is ejected from volcanoes all around this planet, carbon dioxide, carbon monoxide, and sulfur dioxide, etc.

The materials ejected from volcanoes originate from the outer core. There is a point of no return, because it will take decades to reheat the core back to normal temperatures. Volcanoes are the means by

which the outer core rids itself of spent fuel, and volcanoes regulate the pressures in the outer core, volcanoes extends from the surface of the planet down to the outer core. Volcanic eruptions in the past occurred more frequently, and they occurred in various parts around the planet, and were much more powerful, than volcanic eruptions in present days. This is more evidence the core is cooling. The higher the temperature in the core, the more frequent, more wide spread, and the more powerful the eruptions will occur. The cooler the temperature in the core, the less frequent, and the less violent, and the less wide spread the eruptions will occur. Many volcanoes are lying dormant, and haven't erupted in many decades. Crude oil is capable of generating temperatures found in the core, after all crude oil is a hydro- carbon, and hydro-carbons are used to melt, and manufacture steel There are three types of hydro- carbons, crude oil- a liquid, methane- a gas, and coal- a solid. The tremendous pressures ejected from volcanoes are due to the combustion of crude oil in the outer core.

The gases in all hydrocarbons expand, when ignited, and will create pressure in an enclosed vessel, such as the core of this planet. There are two different diagnoses, but only one right solution. My solution is the only correct one. The leading scientists are wrong about everything. Cleaning the air will not reverse global warming. Please keep an open mind. If we choose the wrong solution we will leave our grandchildren and great grandchildren a future that doesn't exist. It will be hellish. The leading scientist will think of another excuse for global warming, when they realize they are wrong, and their plans are not working. Please don't let them do that, time is running out! If the earth past the point of no return, or if the core temperature drops below the flash point of crude oil, all is lost. Don't focus on the fluctuation in temperature from year to year, focus on the weather trends, and the trends are its getting hotter, and the ice in both poles are melting.
