**ABSTRACT:** A scientific research in this article focus that “Human Cell Mass”, “PH Value”, “Human eye Iris Colour intensity” varies proportionately based on “Gene Growth” in the Cell. During the course of **expanding universe** the so called **Modern Human** could have gained present gene count of around **24,473** from initial count of only “**three gene**” of prehistoric human ancestor. It is focused that growth of cell mass shall be considered closely associated with various “**Mass of Atom**” evolved due to impact of variant environment such as UV, RF, IR region of radiation in the **expanding universe**.

[M. Arulmani, B.E., V.R. Hema Latha, M.A., M.Sc., M.Phil. **3G HUMAN ANCESTOR? (A new theory on Human Gene growth and Human Cell Mass)** Stem Cell 2013;4(4):33-39] (ISSN 1545-4570).

<http://www.sciencepub.net>. 6

**Key Words:** Philosophy of “3G Human Origin”; Philosophy of “PH Variation; Philosophy of eye “Iris intensity” variation; Philosophy of “GOD”.

### 1. Introduction

This research focus that the Human Ancestor on origin had very **least cell mass, least PH value, Higher intensity of eye Iris colour**. This research also focus that every human on **evolution** has different cell mass and the cell mass of every human **can not exactly match** with other individual even with **same family**. Billions of human evolved subsequently from

“**prehistoric human ancestor**” shall be considered as Billions of “**Species**” to Prehistoric “**3G Human**”. It is speculated that considerable **bandwidth** difference in cell mass of Human may lead to vast different **genetic characteristics** among human in the expanding universe. The adult cells of human body differentiated from stem cell.

*“3G Human shall mean human ancestor having only three gene on origin”. Human cell mass of every individual shall be considered like Atomic mass level of various Atom.*

- Author.

## 2. Previous Publications

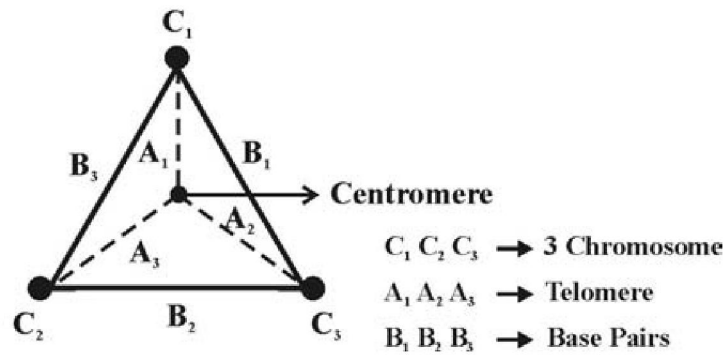

The philosophy of origin of first life and human, the philosophy of model Cosmo Universe, the philosophy of fundamental neutrino particles have already been published in various international journals mentioned below. Hence this article shall be considered as **extended version** of the previous articles already published by the same author.

- [1] Cosmo Super Star – IJSRP, April issue, 2013
- [2] Super Scientist of Climate control – IJSER, May issue, 2013
- [3] AKKIE MARS CODE – IJSER, June issue, 2013
- [4] KARITHIRI (Dark flame) The Centromere of Cosmo Universe – IJIRD, May issue, 2013
- [5] MA-AYYAN of MARS – IJIRD, June issue, 2013
- [6] MARS TRIBE – IJSER, June issue, 2013
- [7] MARS MATHEMATICS – IJERD, June issue, 2013

## 3. Hypothesis

- 1) “**AB**” Blood type origin shall be considered as “**3G Blood**” of Prehistoric origin.
- 2) Human Ancestor had “**Dark Blue Iris**”.
- 3) Human Ancestor is Capable of “**Flying**”
- 4) **Telomere** of cell genome sequence shall be considered closely associated with increase in **cell mass**.
- 5) The size of Telomere genome sequence shall be considered closely associated with “**Chromosome level**” of human.

(i)

(ii)

(ii)

**(Gene growth with higher cell mass)**

4. Hypothetical Narration

1. Philosophy of 3G Human Origin?...

In the expanding Universe 3G human shall be considered as “**first organism**” spontaneously evolved from star dust particles. The 3G Human shall be considered as evolved from most fundamental neutrinos, i.e. **Photon Neutrino, Electron Neutrino, Proton Neutrino**. The three fundamental neutrinos

shall be considered as responsible for existence of all matters in the **universe**. The 3G Human shall be defined within the following scope.

- 1) **3G human** had only 3 Chromosome, 3 Gene derived from three fundamental Neutrinos.
- 2) **3G Human** had 3G Blood "**AB**" Type on origin.
- 3) **3G human** had "**least cell mass**".
- 4) **3G human** had least "**PH Value of Blood**".
- 5) **3G human** had "**Dark Blue Iris**".
- 6) **3G human** was capable of "**flying**".

### (Fundamental Neutrinos)

- (a) Right dot (Proton) - Considered as **DNA** of the cell
- (b) Left dot (Electron) – Considered as **HORMONE** of the cell
- (c) Center dot (Photon) – Considered as **RNA** of the cell

## 2. Philosophy of colour of Eye Iris?...

It is focused that the variation in colour of "**Human eye iris**" shall be considered due to progressive **increase in Gene** in the cell and considerable increase in **cell mass**. The increase in gene growth shall be considered as increase in **DNA Mass, RNA Mass, Hormone Mass**. The Billions of **human iris colour** shall be classified under three most fundamental colour **Bandwidth** during the course of expanding universe.

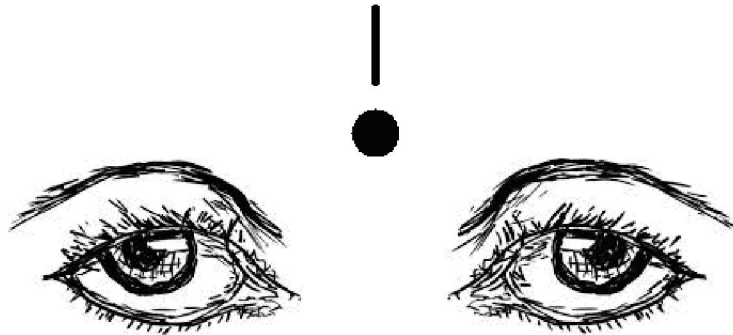

- |                             |   |
|-----------------------------|---|
| 1) " <b>Dark Blue</b> " ..  | <b>Lower Cell Mass</b> (Prehistoric Human)  |
| 2) " <b>Dark Green</b> " .. | <b>Moderate Cell Mass</b> (Ancient Human)   |
| 3) " <b>Dark Red</b> " ..   | <b>Higher Cell Mass</b> (Modern time Human) |

This research focus that the global level in different region human having "**three type of eye iris bandwidth**" shall be considered as "**three generations**" of human in different period during the course of expanding universe. The **Dark Blue Iris**" shall also be called as Prehistoric "**J**" – **Iris**.

(i)

(ii)

**(Prehistoric dark blue eye iris)**

### 3. Philosophy of Human Blood PH Variation?...

It is focused that AB blood type shall be considered as “**3G blood**” having least cell mass, least PH Value on origin. The AB Blood shall also be considered as “**BLACK BLOOD**” or **Black Body Blood**”. The following different type of human blood shall be considered as evolved from **AB type** during the course of Expanding Universe in **different environment**.

- 1) **AB type** - Least PH Value and least cell mass (Prehistoric time)
- 2) **A, B type** - Moderate PH Value and Moderate cell mass (Ancient time)
- 3) **O type** - Higher PH value and Higher cell mass (Modern time)

It is focused that AB Type blood shall be considered as 1<sup>st</sup> generation blood; **AB, A, B** shall be considered as 2<sup>nd</sup> generation blood; **AB, A, B, O** shall be considered as 3<sup>rd</sup> generation type.

### 4. Philosophy of GOD?...

The philosophy “**God**” shall be distinguished from “**human**” within the following scope.

- 1) **God** shall be considered as having **3Gene with Zero Cell mass**.

- 2) **God** shall be considered as having **Blood of Zero PH Value**.
- 3) **God** shall be considered as having absolutely "**Dark eye Iris**".

### 5. How 3G Human looks like?...

This research focus that the 3 G human shall be considered having different genetic characteristics and capable of flying due to impact of low level Telomere sequence.. Further the 3G human on origin shall be considered having highly **Acidic Blood** and lived in **MARS Planet** in Prehistoric time having high immunity. From **Biblical understanding** the 3G human shall be considered as "**ANGEL**", "**ADAM**".

### (3G HUMAN ANCESTOR)

#### **Bible source:**

**Bible evidence shows that prehistoric human populations are capable of flying in the sky**  
(Ps 91:4, Ps 36:7, Ruth 2:12, Luk 2:10-13, Mal 4:1-5).

### 6. STUDY

1. The Gene Count is the number of Genes in a Genome
2. The most basic bacteria had less than 500 Genes

### 5. CASE

3. Changes in Chemical Structure of DNA itself may control the lengthening of Telomere
4. Jonathan William from the Department of Genetics said DNA in human cells is arranged into 46 linear structure known as chromosome. The ends of these

molecules are particularly prone to damage from environment inside the cell and thus have special structure to protect them termed **Telomere**.

5. Telomere is a Ribonucleoprotein complex composed of protein component and RNA primer sequence which acts to protect the terminal ends of chromosome.
6. The DNA which carries genetic information in cells is normally packed in the form of one or more macro molecules called chromosome.

### 7. Conclusion

It is focused that the so called "**ANGEL**" population shall be considered as having only single type **AB** Blood with **little lower cell mass** compared to **ADAM, EVE**. ADAM, EVE, shall be considered having higher cell mass and "**species**" to "**Angel Populations**". The **Angel** shall be defined within the following scope.

- 1) **Angel** shall be considered as species to "**3G Human**".
- 2) **Angel** shall be considered having "**Dark Blue Iris**"
- 3) **Angel** shall be considered having **Acidic Blood** having "**PH**" value much below **7.0**.
