Dedication	I
List of Contents.....	II
List Of Tables	V
List of figures	VI
Acknowledgments.....	VII
ملخص الدراسة.....	IX
Abstract	XI
Chapter One.....	1
1.1 Introduction	1
1.2 Literature Review.....	2
1.2.1 Incidence of Intersex	2
1.2.2 Gender identity and gender role	2
1.2.2.1 Sex and Gender	3
1.2.3 Sexual differentiation	4
1.2.3.1 Male sexual differentiation.....	5
1.2.3.2 Female sexual differentiation.....	6
1.2.4 Role of hormones in sexual differentiation.....	7
1.2.4.1 Hypothalamic hormones	8
1.2.4.2 Pituitary hormones	8
1.2.4.3 The ovarian hormones.....	8
1.2.4.3.1 Fetal ovary.....	9
1.2.4.4 Testicular hormones	10
1.2.4.4.1 Fetal testis.....	10
1.2.4.5 Inhibin, activin, and follistatin	12
1.2.5 The genetic base of intersex.....	13
1.2.5.1 Chromosome Y	13
1.2.5.1.1 SRY gene.....	14
1.2.5.1.2 SRY HMG box or SOX gene family	15
1.2.5.2 Other testicular pathway genes	15
1.2.5.2.1 WT-1 gene.....	16
1.2.5.2.2 SF-1	16
1.2.5.2.3 SOX-9.....	17
1.2.5.2.4 DAX-1 Gene	18
1.2.5.3 Other autosomal genes	18
1.2.6 Classification of intersex.....	21
1.2.6.1 Female pseudohermaphroditism (FPH)	21
1.2.6.1.1 Congenital adrenal hyperplasia (CAH).....	21
1.2.6.1.2 Excess maternal androgen production.....	25
1.2.6.2 Male pseudohermaphroditism (MPH).....	25
1.2.6.2.1 Defects in the biosynthesis of testosterone	27
1.2.6.2.2 5-alpha-reductase deficiency.....	27
1.2.6.2.3 Androgen insensitivity syndrome.....	27
1.2.6.2.4 deficiency of MIS.....	28
1.2.6.3 True hermaphroditism	29
1.2.6.4 Gonadal dysgenesis.....	30

1.2.7 Diagnosis of Intersex.....	34
1.2.7.1 Work up of the newborn with ambiguous genitalia.....	34
1.2.8 Management of intersex disorders	38
1.2.8.1 Surgical management of ambiguous genitalia	40
1.2.9 Objective of the study	41
Chapter Two	42
2.1 Materials and methods	42
2.1.1 Patients	42
2.1.2 Methods.....	43
2.1.2.1 Medical history and physical examination.....	43
2.1.2.2 Samples collection.....	43
2.1.2.3 Cytogenetic analysis.....	43
2.1.2.3.1 Blood Culturing.....	43
2.1.2.3.2 Culture harvesting	44
2.1.2.3.3 Slide preparation	44
2.1.2.3.3.1 Slide staining and analysis	45
2.1.2.4 Molecular analysis.....	45
2.1.2.4.1 DNA extraction	45
2.1.2.4.2 Polymerase Chain Reaction (PCR)	45
2.1.2.5 Hormonal analysis.....	46
2.1.2.5.1 Measurement of Luteinizing hormone (LH).....	46
2.1.2.5.2 Measurement of Follicle stimulating hormone (FSH).....	47
2.1.2.5.3 Measurement of Estrogen.....	47
2.1.2.5.4 Measurement of Testosterone	48
2.1.2.5.5 Measurement of Progesterone.....	48
2.1.2.5.6 Measurement of Prolactin	48
Chapter three.....	49
3.1 Results and Analysis	49
3.1.1 Age, sex, and residence	49
3.1.2 Complains of the patients.....	50
3.1.3 Parental consanguinity	52
3.1.4 Family history	53
3.1.5 Drug history.....	54
3.1.6 Tribal origin.....	55
3.1.7 Psychological assessment.....	56
3.1.8 Clinical diagnosis	58
3.1.8.1 Male pseudohermaphroditism	58
3.1.8.2 Androgen Insensitivity Syndrome (Testicular feminization syndrome).....	58
3.1.8.3 Gonadal dysgenesis.....	60
3.1.8.4 Female pseudohermaphroditism	65
3.1.8.5 True hermaphroditism	67
3.1.8.6 Male pseudohermaphrodites or true hermaphrodite.....	70
3.1.8.7 Female pseudohermaphrodites or true hermaphrodites	71
3.1.8.8 Ambiguous genitalia with dysmorphic features.....	74
3.1.8.8.1 Smith-Lemli- Opitz syndrome	74
3.1.8.8.2 Down's syndrome	74
3.1.8.9 Cases under controversy.....	74
3.1.9 Special cases.....	82
3.1.9.1 Androgen Insensitivity Syndrome (Testicular feminization syndrome, TFS).....	82
3.1.9.2 5-alpha reductase (most propable diagnosis)	82

3.1.9.3 Swyer's syndrome	83
3.1.9.4 True hermaphrodite	83
3.1.10 Treatment	84
Chapter Four	85
4.1 Discussion	85
4.2 Islamic guidelines in sex reassignment	90
4.3 Conclusions and recommendations	91
References	93
Appendix	103
