Cancer Biology

ISSN: 2150-1041 (print); ISSN: 2150-105X (online); Quarterly

CANCER BIOLOGY is a peer reviewed international journal that considers full-length articles and Mini Reviews in a broad range of cancer research, from those elucidating advances in understanding the disease processes of cancer to those helping to establish new paradigms in the diagnosis, treatment, and prevention of cancers. Examples of areas covered by Cancer Biology are: Molecular and cellular mechanisms of cancer biology, such as apoptosis, cell cycle/checkpoint regulation, the genetics and epigenetics of tumorigenesis, angiogenesis and lymphangiogenesis, invasion, metastasis, and host immune responses to cancer. Experimental therapeutics for cancers, including the elucidation of mechanisms for the sensitivity and the resistance to current cancer therapies, identification of new therapeutic targets, and development of new cancer therapies.
